

Acknowledgments

This book has been developed through my research in the last 15 years at the Quantum Computation and Quantum Information Group of the State Key Laboratory of Intelligent Technology and Systems, Tsinghua University and the Quantum Computation Laboratory of the Centre for Quantum Computation and Intelligent Systems, University of Technology Sydney. I have enjoyed very much collaborations and discussions with my colleagues and students there. I would like to thank all of them.

I am particularly indebted to Ichiro Hasuo (University of Tokyo) and Yuan Feng (University of Technology Sydney) who patiently read the draft of this book and kindly provided invaluable comments and suggestions. I am very grateful to the anonymous reviewers for the book proposal; their suggestions were very helpful for the structure of the book. I also would like to sincerely thank Steve Elliot, Punithavathy Govindaradjane, Amy Invernizzi, and Lindsay Lawrence, my editors and project managers at Morgan Kaufmann.

Special thanks go to the Centre for Quantum Computation and Intelligent Systems, Faculty of Engineering and Information Technology, University of Technology Sydney for giving me the freedom to pursue my thoughts.

My research on quantum programming has been supported by the Australian Research Council, the National Natural Science Foundation of China, and the Overseas Team Program of the Academy of Mathematics and Systems Science, Chinese Academy of Sciences. All of them are gratefully acknowledged.
